DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-90 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ury (4,802,178). Ury discloses the claimed invention except for the film (29, 34) explicitly being a multilayer film. Figures 1 and 2 show a laser diode (32), a temperature sensor (28), and a carrier (38). It would have been an obvious matter of design choice to have the have the film (29, 34) explicitly being a multilayer film, since applicant has not disclosed that multilayer film solves any stated problem or is for any particular purpose and it appears that the prior art would perform equally well with the film 29, 34 explicitly being a multilayer film.
